

Video Head Impulse Test (vHIT) Course

13th May 2026

Agenda

9:45	Welcome & Introduction
10:00	Vestibular Ocular Reflex Testing by vHIT <ol style="list-style-type: none">1. Review the physiology and physiological response of the vestibular ocular reflex (VOR) when applied to head movements.2. What is the head impulse VOR response assessing?3. Which head impulse technique should I use?4. How the vHIT VOR relates to natural head movement.
10:45	Workshop 1: vHIT (Lateral canal VOR) <ol style="list-style-type: none">1. Guidance in setting up and using hardware to objectively measure the VOR2. Demonstration of horizontal / lateral head impulses3. Hands on workstations to receive training on the steps needed to conduct successful head impulse for horizontal VOR.4. Review results, editing and spotting artifact
11:15	Comfort Break
11:30	Workshop 2: vHIT (Vertical canal VOR) <ol style="list-style-type: none">1. Guidance in setting up and using hardware to objectively measure the VOR2. Demonstration of vertical / anterior / posterior head impulses3. Hands on workstations to receive training on the steps needed to conduct successful head impulse for vertical VOR.4. Review results, editing and spotting artifact
12:30	Lunch
13:15	Video Head Impulse Testing – Clinical Utility 1 <ol style="list-style-type: none">1. Discussion of vHIT results, and the interpretation when examining peripheral vestibular function2. The application of vHIT in the vestibular diagnostic assessment pathway
14:00	Video Head Impulse Testing – Clinical Utility 2 <ol style="list-style-type: none">1. vHIT, Rotational Chair & Caloric Testing VOR assessment2. vHIT and functional impairment, considerations for retraining / rehab / treatment
14:45	Comfort Break
15:00	Video Head Impulse Testing - application <p>Discussion of vHIT results in real cases. What else should be considered when using vHIT in the clinic?</p>
15:45	Question & Answer
16:00	Finish / Close
